

# Year 10 GEOGRAPHY REVISION CHECKLIST.

## Winter Examinations

As you begin your revision, complete this honestly to help you see where your priorities should lie for your revision. The target is eventually to get all your ticks in the left hand column.

I CAN:		
Define what is meant by a natural hazard		
Name different types of natural hazard		
Explain what is meant by the term tectonic plate		
Describe what is happening at a destructive plate boundary		
Name an example of a destructive plate boundary		
Describe what is happening at a constructive plate boundary		
Describe what is happening at the Mid Atlantic Ridge and draw a diagram to illustrate this		
Describe what is happening and name the features found at a conservative plate boundary		
Name an example of a conservative plate boundary		
Describe what is happening at a collision plate boundary		
Explain how convection currents cause plates to move		
Draw a labelled diagram of a volcano		
Distinguish between lava and magma		
Understand the differences between shield and composite volcanoes		
Understand the impacts of a volcano for a named case study.		
Define the following types of volcano: active, dormant, extinct		
State at least three warning signs for a volcanic eruption		
Name and describe equipment used to monitor volcanoes		
Explain why some people continue to live near active volcanoes		
Explain how earthquakes happen		
Recall how earthquakes are measured
