

Year 10 Geography Revision Checklist. January 2024

As you begin your revision, complete this honestly to help you see where your priorities should lie for your revision. The target is eventually to get all your ticks in the left-hand column.

I CAN:		
Define what is meant by a natural hazard		
Name different types of natural hazard		
Explain how convection currents cause plates to move		
Explain formation of four key plate boundaries, destructive, constructive, conservative and collision. Know the types of plates involved, hazards created and examples of locations.		
Draw a labelled diagram of a volcano		
Distinguish between lava and magma		
Understand the differences between shield and composite volcanoes		
Define the following types of volcano: active, dormant, extinct		
State at least three warning signs for a volcanic eruption		
Name and describe equipment used to monitor volcanoes		
Explain why some people continue to live near active volcanoes		
Explain how earthquakes happen and recall key terms.		
Understand how earthquakes are measured: seismometers, seismographs, magnitude, Richter Scale.		
Recall information about 2015 Nepal Earthquake Case Study		
Understand social, economic and environmental impacts of the earthquake and be able to provide examples.
