

# Year 9 GEOGRAPHY REVISION CHECKLIST.

## January 2024 Examinations

As you begin your revision, complete this honestly to help you see where your priorities should lie for your revision. The target is eventually to get all your ticks in the column on the left.

I CAN:	😊	😞
Identify the countries of the continent of Europe (as indicated by my teacher) on a map.		
Identify the main cities of the continent of Europe (as indicated by my teacher) on a map.		
Match European countries with their capital city.		
Identify the main oceans and seas of Europe on a map.		
Identify the main mountain ranges of Europe on a map.		
Describe various features that can be found along the coast.		
Explain the factors that determine the size of a wave.		
Explain how a wave is formed.		
Distinguish between constructive and destructive waves and consider their impact upon coastal environments.		
Describe the erosional processes of abrasion, attrition, hydraulic action and solution and their impact upon the coast.		
Describe and explain the transportation process of longshore drift. Understand how swash and backwash differ.		
Explain how groynes can protect beaches from the effects of longshore drift.		
Outline the conditions under which coastal deposition may occur.		
Describe and explain the formation of erosional coastal features such as headlands, bays, caves, arches, stacks and stumps.		
Describe and explain the formation of a spit as an example of a depositional feature.		
Describe ways in which humans interact with the coast.		
Give at least three reasons why our coastline may need protected.		
Explain the difference between hard engineering and soft engineering and list several examples of each.		
Explain in detail how two hard and two soft engineering techniques work.
